

CRISTIAN PERCIUN

Flutter / Full-Stack Developer · 7+ years · POS & fiscal systems, AI/LLM

Parma, Italy · (+39) 339 2570045 · cristi.perciun@gmail.com · github.com/CristiPerciun

PROFESSIONAL SUMMARY

Flutter/Dart developer with 7+ years at Custom S.p.A. in the POS/fiscal domain and full-stack skills (Python, PHP, Node/TypeScript, C#/.NET). I take products from idea to release — from the fiscal printer's serial driver to the CI/CD pipeline — with Italian regulatory compliance (Telematic Cash Register, FatturaPA/SdI e-invoicing) and offline-first architectures across 6 platforms.

TECHNICAL SKILLS

Mobile & cross-platform: Flutter (Android, iOS, Web/PWA, Windows, Linux, macOS), Dart, Riverpod, go_router, Drift/SQLite, Isar, MethodChannel (Kotlin/Swift/C++), native Android in Java, Material 3

Backend & databases: Python (FastAPI), PHP (REST APIs, CRON, JWT), Node.js/TypeScript (Cloud Functions), C#/.NET, SQL Server, MySQL, Redis, Firebase (Auth, Firestore), Supabase

AI / LLM: Google Gemini, DeepSeek, OpenRouter, Ollama; multi-provider abstraction layer, prompt engineering, multi-agent orchestration, text-to-speech and generative media

Fiscal & POS hardware: FatturaPA/SdI e-invoicing, Telematic Cash Register (RT), digital receipts; fiscal/ESC-POS printers, EFT-POS payment terminals, cash keepers, customer displays over serial/RS232, TCP, USB; MQTT

DevOps, CI/CD & testing: Jenkins + SonarQube, GitHub Actions, Docker, self-hosted deployment (Raspberry Pi, systemd), MSIX/.deb/APK packaging; Appium, Espresso, Silk, TestRail; Continuous Integration/Continuous Delivery (CI/CD)

Security & OAuth: OAuth1 with hand-implemented HMAC-SHA1 signing, OAuth2, CAS flows, MFA/2FA, certificate pinning, secure storage

WORK EXPERIENCE

Custom S.p.A. — Parma, Italy

Software Developer (Mobile & Desktop)

12/2024 – Present

- App **InventaOne**, a Flutter POS management system shipped on 4 platforms (Windows, Android, iOS, Linux) from a single codebase, unifying sales, table/dining-room management, FatturaPA/SdI e-invoicing and an AI-powered sales-query dashboard (Gemini).
- Designed an offline-first architecture (Drift/SQLite with versioned migrations, local HTTP server with TLS and certificate pinning, MQTT messaging) keeping checkout stations fully operational without connectivity.
- Library **dartpos**, a Flutter SDK integrating 4 families of point-of-sale peripherals (fiscal/ESC-POS printers, EFT-POS terminals, cash keepers, customer displays) over an abstracted serial/Ethernet/USB transport layer, eliminating duplicated integration code across products.

- Automated quality and release with Jenkins + SonarQube, obfuscated MSIX packaging, signed .deb and Appium end-to-end tests; built a reusable logging package with persistent send queues and retry.

Software Developer

09/2022 – 12/2023

- Developed and maintained the KeepUp Smart and KeepUp Order native Android applications (Java, multi-flavor builds, ProGuard) for sales and hospitality.
- Implemented automated UI tests with Espresso, integrating results into TestRail, and automated the reporting cycle in CI (Jenkins, Silk, Telegram notifications), reducing manual verification effort.
- Developed REST APIs and CRON jobs in PHP on the company cloud platform — e-invoicing, device telemetry, licensing — on MySQL and SQL Server.

Software & Firmware Testing

09/2018 – 09/2022

- Verified integrity and quality of fiscal-device firmware and software and managed release publication on official portals.
- Provided 3rd-level technical support on critical cases, from root-cause analysis to direct corrective fixes to product code.

Protec S.r.l. — Parma, Italy

Summer internship — IT laboratory

06/2016

- Supported lab software development and management, delivering assigned tasks on schedule.

PERSONAL PROJECTS

End-to-end projects designed, built and shipped independently — github.com/CristiPerciun

FitAI Analyzer + garmin-sync-server — AI-powered fitness platform

Multi-platform Flutter app turning Garmin/Strava data into AI-generated daily goals, with a self-hosted Python backend. Hand-implemented Garmin OAuth1 HMAC-SHA1 signing with MFA handling, incremental delta sync and a 3-tier Firestore data strategy to cut AI prompt costs.

Stack: Flutter, Riverpod, Firebase, FastAPI, Docker, Raspberry Pi/systemd, GitHub Actions, PWA on GitHub Pages

Generative-AI content automation

Multi-agent pipeline generating videos and social content with human approval before publishing: role-based LLM scripting, text-to-speech, generative images and publishing via Meta Graph API.

Stack: Flutter desktop, Python, Gemini/Ollama, Kokoro TTS, FFmpeg, Isar/Hive

MisuraPerfetta — parametric tailoring patterns

Parametric computation engine turning body measurements into sewing patterns, with PDF export/printing and 3D preview.

Stack: Flutter Web/Windows, Drift on WebAssembly, pdf/printing

EDUCATION

Diploma in Electronics — ITIS Leonardo da Vinci technical institute, Parma, Italy

CERTIFICATIONS

English language certification — B2 level (CEFR)

Workplace safety certification — C.F.P.

LANGUAGES

Romanian (Moldovan): native · Italian: full professional proficiency · Ukrainian/Russian: full professional proficiency · English: B2 certified
